Index of Subjects

VOLUME 99 (1996)

(Abstracts from Society Proceedings and abstracts from the 8th European Congress (special issue: Vol. 99/No. 4) are not included)

Aging; Event-related potentials; Topographic analysis; P300 (99) 458

Alpha response; Phase-locking; Event-related potentials; Auditory evoked potentials; Children; EEG (99) 527

Alzheimer's disease; Quantitative electroencephalography; Prognosis (99) 123

Alzheimer's disease; N400; Spoken sentences; Semantic priming (99) 235

Apnea; SpO_2; Electroencephalogram; Seizures; Epilepsy; Sleep disorders (99) 432

Asymmetry of the electroencephalogram; Attention; Response preparation; Stimulus-response compatibility; Lateralized readiness potential (99) 149

Attention; Response preparation; Stimulus-response compatibility; Asymmetry of the electroencephalogram; Lateralized readiness potential (99) 149

Auditory cortex; Directional hearing; Interaural intensity difference; Auditory evoked potential; Long latency components; Sound lateralization (99) 479

Auditory evoked potential; Directional hearing; Interaural intensity difference; Long latency components; Sound lateralization; Auditory cortex (99) 479

Auditory evoked potentials; Alpha response; Phase-locking; Event-related potentials; Children; EEG (99) 527

Auditory short-term memory; Event-related potentials; Contingent negative variation (99) 28

Bereitschaftspotential; Movement-related brain macropotentials; Skilled performance positivity; Practice; Learning; Skill (99) 495

Biosignal data format; Computer tools; EEG analysis; Standardization of archival formats; Data compression (99) 426

Boundary element method; Realistic head models; Local refinement; Inverse problem; Dipole model (99) 79

Brain computer interface; Neural networks; Movement; Event-related desynchronization; Post-movement beta synchronization (99) 416

Brain development; Electroencephalography; Non-linear dynamics; Chaos theory; Lyapunov coefficient (99) 405

Carbamazepine; Focal transcranial magnetic stimulation; Cortical inhibition; Cortical facilitation; Paired stimuli; Silent period (99) 267

Chaos theory; Electroencephalography; Non-linear dynamics; Lyapunov coefficient; Brain development (99) 405

Children; Alpha response; Phase-locking; Event-related potentials; Auditory evoked potentials; EEG (99) 527

Cognition; Correlation dimension; Electroencephalogram; Mental activity; Non-linear dynamics (99) 214

Cognition; Temporal lobe epilepsy; Working memory; Memory-scanning; Event-related potentials (99) 200

Computer tools; Biosignal data format; Computer tools; EEG analysis; Standardization of archival formats; Data compression (99) 426

Confusional state; Periodic lateralized epileptiform discharges (PLEDs); Vascular; Electroencephalography; Periodic activities (99) 287

Contingent negative variation; Auditory short-term memory; Event-related potentials (99) 28

Correlated noise; Dipole localization; Reference; Generalized least squares; Standard errors (99) 562

Correlation dimension; Cognition; Electroencephalogram; Mental activity; Non-linear dynamics (99) 214

Correlation dimension; Slow-wave activity; Power spectra; Sleep regulation; Deterministic chaos; Stochastic process (99) 539

Cortical facilitation; Focal transcranial magnetic stimulation; Cortical inhibition; Paired stimuli; Silent period; Carbamazepine (99) 267

Cortical inhibition; Focal transcranial magnetic stimulation; Cortical facilitation; Paired stimuli; Silent period; Carbamazepine (99) 267

Cortical myoclonus; Magnetoencephalography; Pre-myoclonus spike (99) 141

Cortisol; Habituation; Event-related potential; Heart rate; Pituitary adrenal axis (99) 247

Currents of injury; Magnetoencephalography; DC fields (99) 16

Data compression; Standardization of archival formats; Biosignal data format; Computer tools; EEG analysis; Standardization of archival formats (99) 426

DC fields; Magnetoencephalography; Currents of injury (99) 16

DC potential; Hyperventilation; Hypoventilation; End-tidal $PACO_2$; End-tidal PAO_2; Impedance (99) 90

Depth EEG; Temporal lobe epilepsy; Seizure morphology; Outcome; Mesial temporal sclerosis (99) 412

Deterministic chaos; Slow-wave activity; Power spectra; Sleep regulation; Stochastic process; Correlation dimension (99) 539

Development; Dimensional complexity (99) 63

Dimensional complexity; Development (99) 63

Dipole localization; Reference; Generalized least squares; Correlated noise; Standard errors (99) 562

Dipole model; Realistic head models; Local refinement; Boundary element method; Inverse problem (99) 79

Dipole; Epilepsy; Intracranial; Extracranial; Volume conduction (99) 69

Directional hearing; Interaural intensity difference; Auditory evoked potential; Long latency components; Sound lateralization; Auditory cortex (99) 479

EEG analysis; Biosignal data format; Computer tools; EEG analysis; Standardization of archival formats; Data compression (99) 426

EEG; Alpha response; Phase-locking; Event-related potentials; Auditory evoked potentials; Children (99) 527

EEG; Electrode; Multichannel; MEG (99) 568

Electroconvulsive therapy; Electroencephalogram; Nonlinear dynamics; Lyapunov exponents; Seizure (99) 129

Electrode; Multichannel; EEG; MEG (99) 568

Electroencephalogram; Cognition; Correlation dimension; Mental activity; Non-linear dynamics (99) 214

Electroencephalogram; Electroconvulsive therapy; Nonlinear dynamics; Lyapunov exponents; Seizure (99) 129

Electroencephalogram; μ-Rhythm; Event-related desynchronisation; Voluntary movement; Hand dominance; Handedness (99) 174

Electroencephalogram; SpO_2; Seizures; Epilepsy; Sleep disorders; Apnea (99) 432

Electroencephalography; Full-term newborn; Preterm newborn; Transients; Follow-up (99) 1

Electroencephalography; Magnetoencephalography; Event-related potentials; Event-related fields (99) 191

Electroencephalography; Non-linear dynamics; Chaos theory; Lyapunov coefficient; Brain development (99) 405

Electroencephalography; Periodic lateralized epileptiform discharges (PLEDs); Confusional state; Vascular; Periodic activities (99) 287

Electroencephalography; Singular value decomposition; Truncated pseudoinverse; Reference electrode selection (99) 163

Electroencephalography; Subacute sclerosing panencephalitis; Hemiplegia; Periodic complexes (99) 440

End-tidal $PACO_2$; DC potential; Hyperventilation; Hypoventilation; End-tidal PAO_2; Impedance (99) 90

End-tidal PAO_2; DC potential; Hyperventilation; Hypoventilation; End-tidal $PACO_2$; Impedance (99) 90

Epilepsy; Intracranial; Extracranial; Dipole; Volume conduction (99) 69

Epilepsy; SpO_2; Electroencephalogram; Seizures; Sleep disorders; Apnea (99) 432

Error processing; Response priming; N2; P3; LRP; Nogo task; Motor inhibition (99) 19

Event-related desynchronisation; Electroencephalogram; μ-Rhythm; Voluntary movement; Hand dominance; Handedness (99) 174

Event-related desynchronization; Neural networks; Movement; Post-movement beta synchronization; Brain computer interface (99) 416

Event-related fields; Magnetoencephalography; Electroencephalography; Event-related potentials (99) 191

Event-related potential; Habituation; Heart rate; Cortisol; Pituitary adrenal axis (99) 247

Event-related potentials; Aging; Topographic analysis; P300 (99) 458

Event-related potentials; Alpha response; Phase-locking; Auditory evoked potentials; Children; EEG (99) 527

Event-related potentials; Auditory short-term memory; Contingent negative variation (99) 28

Event-related potentials; Magnetoencephalography; Electroencephalography; Event-related fields (99) 191

Event-related potentials; Recognition memory; Repetition effects; Hemispheric asymmetries; Non-words; Figures (99) 517

Event-related potentials; Spatial cueing; Parietal lesions; Visual extinction (99) 444

Event-related potentials; Temporal lobe epilepsy; Cognition; Working memory; Memory-scanning (99) 200

Event-related potentials; Visuo-spatial attention; Visual search; Pop-out; N2 (99) 225

Expectancy; Lateralized readiness potential; Reaction time (99) 491

Extracranial; Epilepsy; IntracranialDipole; Volume conduction (99) 69

Figures; Event-related potentials; Recognition memory; Repetition effects; Hemispheric asymmetries; Non-words (99) 517

Focal transcranial magnetic stimulation; Cortical inhibition; Cortical facilitation; Paired stimuli; Silent period; Carbamazepine (99) 267

Follow-up; Electroencephalography; Full-term newborn; Preterm newborn; Transients (99) 1

Full-term newborn; Electroencephalography; Preterm newborn; Transients; Follow-up (99) 1

Generalized least squares; Dipole localization; Reference; Correlated noise; Standard errors (99) 562

Habituation; Event-related potential; Heart rate; Cortisol; Pituitary adrenal axis (99) 247

Hand dominance; Electroencephalogram; μ-Rhythm; Event-related desynchronisation; Voluntary movement; Handedness (99) 174

Handedness; Electroencephalogram; μ-Rhythm; Event-related desynchronisation; Voluntary movement; Hand dominance (99) 174

Heart rate; Habituation; Event-related potential; Cortisol; Pituitary adrenal axis (99) 247

Hemiplegia; Subacute sclerosing panencephalitis; Periodic complexes; Electroencephalography (99) 440

Hemispheric asymmetries; Event-related potentials; Recognition memory; Repetition effects; Non-words; Figures (99) 517

Human; Magnetoencephalography; MEG; Sleep; K-complex; Minimum-norm estimate (99) 544

Hyperventilation; DC potential; Hypoventilation; End-tidal $PACO_2$; End-tidal PAO_2; Impedance (99) 90

Hypoventilation; DC potential; Hyperventilation; End-tidal $PACO_2$; End-tidal PAO_2; Impedance (99) 90

Impedance; DC potential; Hyperventilation; Hypoventilation; End-tidal $PACO_2$; End-tidal PAO_2 (99) 90

Inferior colliculi; Nitric oxide; Sound-evoked electrocortical desynchronization; N^{ω}-Nitro-L-arginine methyl ester; *N*-Methyl-D-aspartate receptor antagonists (99) 57

Interaural intensity difference; Directional hearing; Auditory evoked potential; Long latency components; Sound lateralization; Auditory cortex (99) 479

Intracranial; Epilepsy; Extracranial; Dipole; Volume conduction (99) 69

Inverse problem; Realistic head models; Local refinement; Boundary element method; Dipole model (99) 79

K-complex; Magnetoencephalography; MEG; Sleep; Minimum-norm estimate; Human (99) 544

Knowledge of results (KR); Readiness potential (RP); Stimulus-preceding negativity (SPN); Motor preparation; Stimulus anticipation; Post-movement negativity (99) 508

Lateralized readiness potential; Attention; Response preparation; Stimulus-response compatibility; Asymmetry of the electroencephalogram (99) 149

Lateralized readiness potential; Reaction time; Expectancy (99) 491

Learning; Movement-related brain macropotentials; Bereitschaftspotential; Skilled performance positivity; Practice; Skill (99) 495

Linear estimation; Readiness potential; Supplementary motor area (99) 183

Local refinement; Realistic head models; Boundary element method; Inverse problem; Dipole model (99) 79

Long latency components; Directional hearing; Interaural intensity difference; Auditory evoked potential; Sound lateralization; Auditory cortex (99) 479

LRP; N2; P3; Nogo task; Motor inhibition; Response priming; Error processing (99) 19

Lyapunov coefficient; Electroencephalography; Non-linear dynamics; Chaos theory; Brain development (99) 405

Lyapunov exponents; Electroconvulsive therapy; Electroencephalogram; Nonlinear dynamics; Seizure (99) 129

Magnetoencephalography; Cortical myoclonus; Pre-myoclonus spike (99) 141

Magnetoencephalography; DC fields; Currents of injury (99) 16

Magnetoencephalography; Electroencephalography; Event-related potentials; Event-related fields (99) 191

Magnetoencephalography; MEG; Sleep; K-complex; Minimum-norm estimate; Human (99) 544

MEG; Electrode; Multichannel; EEG (99) 568

MEG; Magnetoencephalography; Sleep; K-complex; Minimum-norm estimate; Human (99) 544

Memory-scanning; Temporal lobe epilepsy; Cognition; Working memory; Event-related potentials (99) 200

Mental activity; Cognition; Correlation dimension; Electroencephalogram; Non-linear dynamics (99) 214

Mesial temporal sclerosis; Temporal lobe epilepsy; Depth EEG; Seizure morphology; Outcome (99) 412

Minimum-norm estimate; Magnetoencephalography; MEG; Sleep; K-complex; Human (99) 544

Motor field; Movement-related cortical field; Readiness field; Temporal spectral evolution (99) 274

Motor inhibition; N2; P3; LRP; Nogo task; Response priming; Error processing (99) 19

Motor preparation; Readiness potential (RP); Stimulus-preceding negativity (SPN); Stimulus anticipation; Post-movement negativity; Knowledge of results (KR) (99) 508

Movement; Neural networks; Event-related desynchronization; Post-movement beta synchronization; Brain computer interface (99) 416

Movement-related brain macropotentials; Bereitschaftspotential; Skilled performance positivity; Practice; Learning; Skill (99) 495

Movement-related cortical field; Readiness field; Motor field; Temporal spectral evolution (99) 274

μ-Rhythm; Electroencephalogram; Event-related desynchronisation; Voluntary movement; Hand dominance; Handedness (99) 174

Multichannel; Electrode; EEG; MEG (99) 568

Multiple sleep latency test; Sleepiness; Sleep; Polysomnography; Sleep deprivation (99) 10
